

Thoroughly assessing a vendor can be like climbing a mountain every time...

# THE FASTER, EASIER WAY TO ASSESS YOUR VENDOR

67%

of CISOs say their company is more likely to have a data breach in 2018...

51%

of those say it will likely be from a failure to **control third parties**.

Vendor assessments are essential to ensure your data is protected, but the process can be a **time-consuming, uphill climb**.

Even after you complete one assessment, there's still plenty more to do and with **limited support**.

63%

say their IT security budget will either **stay the same or decrease** in 2018.

**Vendor Evidence Sharing Networks** deliver completed vendor questionnaires to speed up your assessment process.

**Assess more vendors faster in just three steps...**

## STEP 1

Become a member of your industry-specific vendor network.

Choose your industry:

## STEP 2

Access completed and validated vendor surveys.

Gain instant access to vendor information in one repository.

Leverage workflows, reporting, scoring, and other features in one convenient tool.

## STEP 3

Get to work on what matters.

Refocus your assessment time and resources towards protecting your organization.

Stay informed with continuous vendor monitoring.

Prevalent offers the only unified platform on the market for third party risk management, with the capabilities and software to build a custom, end-to-end solution.
